

XM is a pay service and should be allowed to broadcast anything they want to. I think having the traffic is a great feature, I have used it many times, living in the NY area I listen to the NY traffic when I go into NYC and on other trips. As a public safety official who works on the Higways that border New York it is vital that I have the XM traffic to monitor if something is going on in New York area that could effect traffic in my jurisdiction. Let XM keep the ability to provide this very valuable service
